Languages

English
Sinhala

I am a dedicated web developer with a strong foundation in front-end technologies and experience across the development stack. Skilled in creating responsive, user-focused websites, I aim to deliver clean, efficient code and engaging user experiences. With hands-on experience in MERN, Nextjs and various modern web-frameworks and libraries, I am eager to join a collaborative team as an Associate Web Developer, where I can contribute my skills, learn from industry professionals, and further refine my craft.

Education

1. Java Institute – Sri Lanka
   Bachelor of Science in Software Engineering
   Year – 2023 / 2027
